2024-2026

Mid-Level Developer/Trainee WebWhizz Services

- **Custom Web Architecture:** Engineered and deployed high-performance custom websites, including **SEOMavens**, focusing on scalable code and optimized user journeys.
- **E-Commerce & Inventory Solutions:** Developed a comprehensive **Inventory Management System** for a retail mart, integrating real-time tracking and database management to streamline operations.
- **Platform Management:** Managed and optimized multiple WordPress environments, ensuring 99.9% uptime and implementing advanced security and SEO protocols.
- **Business-Oriented Design:** Built tailored web solutions for diverse business sectors, translating client requirements into functional, high-converting digital assets.

Since 2022

Freelancer

- **End-to-End Development:** Successfully delivered 10+ custom WordPress websites for diverse clients, handling everything from initial wireframing to final deployment.
- **Performance Optimization:** Managed ongoing site maintenance and security updates, consistently achieving Google PageSpeed scores of 90+.
- **Client Management:** Acted as the primary point of contact, translating non-technical business requirements into functional digital solutions.
- **Growth Strategy:** Integrated SEO best practices (on-page and technical) into every build, helping clients improve their organic search visibility.
